Ritchie Bros.   *June 6, 2025*

Position: Software Engineer

To the Team at Ritchie Bros.,

About

As a dedicated software engineer with a diverse background, I am drawn to Ritchie Bros. for its innovative approach to technology in the auction industry. My unique combination of military experience and skills acquired at Columbia University in computer science aligns perfectly with Ritchie Bros' mission to transform how sourcing and selling equipment is done. I am eager to contribute my capabilities to your robust team.

Experience

During my tenure as a Software Development Engineer with WEX Health, I played an instrumental role in developing features for our iOS application, leveraging my skills in object-oriented programming and mobile development. My academic journey at Columbia equipped me with advanced knowledge in algorithms and data structures, supplemented by my proactive approach to learning new tech stacks quickly. Additionally, my military background as an infantryman taught me the importance of maintaining composure under pressure, allowing me to navigate complex challenges effectively and find the best solutions promptly. This experience is complemented by my coursework in both undergraduate and graduate computer science classes, showcasing my commitment to continuous learning.

What I Bring

I bring a unique perspective shaped by both my technical and military backgrounds, enabling me to approach complex problems with a strategic mindset. My diverse experiences foster a strong adaptability to new and evolving technologies, along with a commitment to teamwork and collaboration. I align with Ritchie Bros. values by placing high importance on integrity and efficiency, ensuring that the solutions I create not only meet but exceed user expectations.

Best Regards,

Rey Christopher D. Aparece
